Fever and Ague,

from which mankind suffer over a large part of the globe, is the consequence of a diseased action in the system, induced by the poisonous miasm of vegetable decay. This exhalation is evolved by the action of solar heat on wet soil, and rises with the watery vapor from it. While the sun is below the horizon this vapor lingers near the earth's surface, and the virus is taken with it through the lungs into the blood. There it acts as an irritating poison on the internal viscera and excreting organs of the body. The liver becomes torpid and fails to secrete not only this virus, but also the bile from the blood. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the instinct of our organism, as if in an attempt to expet the noxions infusion, concentrates the whole blood of the body in the internal excretories to force them to cast it out. The blood leaves the surface, and rushes to the ceatral organs with congestive violence. This ont. The blood leaves the surface, and rushes to the central organs with congestive violence. This is the Carll. But in this effort it fails. Then the Faven follows, in which the blood leaves the central organs and rushes to the surface, as if in another effort to expel the irritating poison through that other great excretory—the skin. In this also it fails, and the system abandons the attempt exhausted, and waits for the recovery of strength to repeat the hopeless effort another day. These are the fits or paroxysms of Faven and Agive. Such constitutional disorder will of course undermine the health if it is not removed.

We have labored to find, and have found, an antidete.

Ayer's Ague Cure,
which neutralizes this malarious poison in the
blood, and stimulates the liver to expel it from the
body. As it should, so it does cure this afflicting
disorder with perfect certainty. And it does more,
or rather does what is of more service to those subject to this infection. If taken in season it expels
it from the system as it is absorbed, and thus keeps
those who use it free from its attacks; keeps the
system in health although exposed to the disease.
Consequently it not only cures, but protects from,
the great variety of affections which are induced
by this malignant influence, such as Remittent
Fever. Chill Fever, Dumb, or Masked Ague,
Periodical Headache, or Bilious Headache, Bilious
Fevers, Neuralgia, Rheumatism, Gout, Blindness,
Toothache, Earache, Catarrh, Asthma, Palpitations, Painful Affections of the Spleen, Hysteries,
Colic, Paralysis, and Painful Affections of the
Stomach and Bowels, all of which, when trising
from this cause, will be found to assume more or
less the intermittent type. This "Agua Cure"
removes the cause of these derangements, and cures
the disease.

This it accomplishes by stimulating the excretories to expel the virus from the system; and
these organs by degrees become habited to do this
their office of their own accord. Hence arises what
we term acclimatation. Time may accomplish the
sacae end, but often life is not long enough, or is
sacrificed in the attempt, while this "AGUE CURE"
does it at once, and with safety. We have great
reason to believe this is a surer as well as safer
remedy for the whole class of diseases which are
caused by the miasmatic infection, than any other
which has been discovered; and it has still another
important advantage to the public, which is, that
it is cheap as well as good.
